TOWN OF REDCLIFF

"The Local Tax Arrears Consolidation Act 1935"

The Council of the Town of Redcliff have passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing.

All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December or next as hereinafter mentioned. The following persons may make application to the Council to come under the provisions of the above Act.

Any person firm or corporation who is the owner of any parcel of land in the town of Redcliff against which there is a subsisting notification for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff but not sold, or such persons personal representative.

In such cases where the applicants property is to be exposed for sale at the forthcoming Tax Sale on August 24th, 1935 such applicants should make their applications in time for the council to consider same previous to that date.

Upon receipt of the application the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes if the same were consolidated and the applicant shall deposit with the Secretary Treasurer one-fifth of such sum.

In such cases where the application to consolidate is made after the 15th day of November 1935 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current years taxes. In any event the current years taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted the deposit shall be applied to the applicant's consolidated arrears otherwise it shall be repaid to him.

In case the application is not granted provision is made for said Act for an appeal to the Minister of Municipal Affairs.

The Council may on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister by resolution, extend that agreement for one year and waive payment of the installment payable under the agreement for any one year of the years for which such agreement is made in case it is thought proper so to do by reason of crop failure or other circumstances. No buildings, fences, fixtures, or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such

consolidation agreement is in force.

Nearly 1,000 students are registered at the summer school for teachers at the University, this being the 23rd annual summer school conducted by the Provincial Department of Education in co-operation with the University.

SAVE

WE'VE heard a lot of that word "save" in the past few years. For some time now the question of saving our pennies and dimes has not only been important—but imperative.

Also: It may be noted that everyone who is in the business of selling merchandise to the public has devoted his attention to pointing out how much you, the customer, can SAVE by dealing with him, to the exclusion of others. Which is perfectly all right, too, in the way, except that it is advisable for a customer in his own interests to be sure that the savings that he is getting are real and not simply over enthusiasm on the advertiser's part. In other words to save where it's SAFE to save—to save, for instance at EATON'S, where value means not simply cheapness—but quality at a price and where every claim regarding merchandise is backed by irrefragable guarantee of satisfaction that makes every purchase doubly safe. It's natural to want to save—but it's wise to remember that "it's SAFE to save at EATON'S."

EATON'S

Great Scenic Wonderland

Canadian Rockies Provide Thrills For The Motorist

The fame of the Canadian Rockies as an unsurpassed summer playground has spread throughout the world, and each year sees an increasing number of tourists visiting this great scenic wonderland. Through the construction of modern motor highways access has been provided to scenes of Nature's beauty spots and great panoramas of rugged mountain grandeur revealed.

Motoring in the Canadian Rockies provides one of the unforgettable thrills of a vacation spent in Canada, and of all the routes open to motorists the most spectacular is that linking the Prairie with the Pacific, which traverses the two great mountain playgrounds, Banff and Yoho National Parks, and furnishes access to such well-known tourist resorts as Banff, Lake Louise, Moraine Lake, Emerald Lake, and the wonderful Yoho Valley. The route from Winnipeg to Vancouver forms the western half of the Trans-Canada highway and is continuous but for the uncompleted section across the Selkirk range. Pending the completion of this stretch from Golden, British Columbia, to the "Big Bend" highway, motor tourists may bridge the gap by alighting their automobiles by rail. During the 1935 season a daily automobile transport service in each direction between Revelstoke and Golden, commencing June 15 and ending September 15, will replace the tri-weekly service provided last year.

The train journey between Revelstoke and Golden will be made by daylight, thus providing a wonderful opportunity of viewing the wonders of the Rockies, their endless vistas of moss-covered peaks, glaciers, and verdant Alpine valleys. There will be no delay or unnecessary expense to the motorist, as automobiles and passengers will be carried on the same train and the motorist will be ready for immediate departure on arrival at Golden or Revelstoke. This service provides motorists with an all-Canadian route from Winnipeg to Vancouver.

Some Facts About Mars

Scarcity Of Water On Planet And Atmosphere Is Planed

The temperature of Mars must be one of great extremes, due to the rarities of the atmosphere. Fronts as the equator passes occur night, says Nature Magazine. The surface temperature of Mars, at midnight at the equator, has been estimated to be about 100 degrees below zero on a clear, cool day in spring, or about 60 degrees Fahrenheit.

Surface gravity on the planet is only a little more than a third of what is on earth, and a man weighing 150 pounds here would be 50 weight reduced to 37 pounds on Mars.

Distance of the planet is 4213 miles, not much more than half that of the earth.

A most striking difference lies in the great abundance of water on the earth—three-fourths of the earth's surface is water—and the great scarcity of water on Mars, presenting a most serious problem to conservation to its inhabitants, if such there are.

Mars has a day only a little longer than that of our planet. The inclination of its axis of rotation to its orbit is about the same as that of the earth to its orbit. The Martian year is one year, ten and a half months. So the Martian seasons are similar to ours but nearly twice as long.

There is a summer, winter, spring and fall on Mars as there is on the earth. There is also an atmosphere on Mars, although it is much less dense than our own, and there are clouds, although they are comparatively rare phenomena.

Messages Of Congratulation

Over 10,000 telegrams have been sent out from the Court Post Office at Buckingham Palace in reply to messages of congratulation to the King on the Silver Jubilee. So complicated was the task of replying that the King approved a system of numbered telegrams to be used for various types of messages, states the News of the World. Fifteen separate forms of reply were used.

Only Three Used

It is curious that of the 15 months of the year, only three are first names for persons—two feminine and one masculine. May and June are very good names for girls and August is all right for boys. And why not April for girls and March for boys?

THE KING RIDES FAVORITE CHARGER IN BOTTEN ROW

The King went for an early morning ride in Botten Row, Hyde Park, two mornings in succession, when he rode the horse he rode at the Trooping of the Colour ceremony. Here we see His Majesty smiling acknowledgment of the salutes of other riders.

Scotland's Noblest River

Silver Tweed Connected With Places Famous In War And Verse

Canada's new Governor-General, Baron Tweedsmuir, has taken his title from the parish of his ancestors which, in turn, took its name from Scotland's noblest river. The silver Tweed is not a stream of industry or commerce like the Clyde or the Thames. It keeps its sparkling waters free of the mill of trade so that pleasure craft may have room and the salmon find harborage. It is not a big river as rivers go with us—it is only about a hundred miles long. But it rolls through a country of great beauty and one as rich in story as any world knows.

"Which of the world's streams," asks George Borrow, "can Tweed deny?" The Tweed rises in the south of Perthshire, not far from Tweedsmuir, and flows through or along the boundaries of Perthshire, Selkirkshire, Roxburghshire, Berwickshire and Northumberland until it reaches the sea at Berwick. For 17 miles of its course it constitutes the boundary between England and Scotland. There are many number of notable places along the Tweed and its tributaries. "I can stand on hills," writes Scott, "and point out 43 places famous in war and verse." Eldon, hills themselves, with Troskell, the ancient Roman camp at their base, are among the famous places; and to the north are the ruins of Melrose, and abbey noted in its day for the beauty of its architecture and the austerity of its monks. Dryburgh Abbey, which like Melrose, was wrecked by the heavy hand of Edward I, is also in the valley of the Tweed. And so is Abbotford, where Sir Walter Scott lived and passed away, and Benybride, where Lord Blyth spent his last years—Vancouver Province.

Hottest Star

Newly Discovered Star Held To Be Six Times As Hot As The Sun

The hottest body in the universe is the new star "Nova Herculis," discovered last December by a British amateur astronomer, Prof. Bruce Veylanov of the Moscow astronomical observatory, asserted. He said months of study with powerful telescopic and photographic apparatus had convinced him the temperature of the new star was six times that of our sun.

Feetly Equipped

"Now, children," said the schoolmaster, "how do you suppose Noah passed his time on the ark?" There was no reply. "Come, now," he went on. "It's my opinion that he did a lot of fishing. Am I right or wrong?" "Wrong," replied little Freddie. "Wrong," said the schoolmaster.

"And why?" "Noah couldn't have done much fishing," replied the boy, "he'd only got two worms."

Agricultural Revenue

The total farm agricultural revenue of Canada for 1934 is estimated at \$291,847,000, as compared with \$290,846,000, the revised estimate for 1933. This represents an increase of \$138,410,000 or 16 per cent. There are increases in the revenue from all items, the greatest increases being shown in field crops, farm animals and dairy products.

Makes It Taste Better

Cherry Syrup Takes Bad Flavor Out Of Medicine

Led by cherry syrup, a new sweet, the cost of taking the bad taste out of medicine is going down. The movement is a swing back to some of the practices in grand-mother's days, fostered by the American Pharmaceutical Association at the meeting of the Canadian and American Medical Association. Under this plan, as exhibited in Atlantic City, N.J., physicians can make the horrible taste of medicine with simple syrups at one quarter the cost of proprietary preparations. The cherry syrup is used to make the taste of preparations used for giving liquids to children. The taste is not so bitter in nature, but in the new syrup the flavor is only that of cherry soaked in sugar.

Taking Things Easy

London Physician Did Not Practice What He Preached

Dr. J. E. H. Roberts, an eminent London physician, came to New York to address a congress of international surgeons. His topic was the advisability of taking it easy, and stressed the disadvantages of the rush necessitated by modern life. To arrive in New York in time for the lecture Dr. Roberts had to commandeer a fast car from Waterloo Station to Southampton because he missed the train in London. At the Southampton pier he discovered that the boat already had sailed and so he hired a tug, chased the liner to Southampton Water and boarded the vessel there!

The Leap Extraordinary

"Twas a dark and stormy night. The trainman, says the C.N. Railway Magazine, was signaling the engineer when he dropped the lantern to the ground. Another man, passing by, tossed it back up to him on top of the box-car.

In a few minutes the engineer's new man, came rushing to the scene. "Let's see you do that again," he said.

Do What?

"Jump from the ground to the top of that box-car."

How To Treat Poison Ivy

Some Simple Remedies That May Be Found Locally

Various treatments for ivy poisoning are given in the free pamphlet on poison ivy issued by the Dominion Department of Agriculture. The treatment most widely recommended at the present time is to wash affected parts with a three per cent. solution of potassium permanganate. The stain left by this solution soon disappears or may be removed slowly by soap and water. Iodine tincture will also be found useful. Once the blisters have appeared all rubbing should be avoided, and care taken to prevent infection spreading by painting iodine around the edges of the sores, and by using compressed soaked in a two per cent. solution of sodium acetate, diluted with water, or a weak solution of colic acid solution of sugar of lead (50 to 60 per cent. rubbing alcohol) or any other cooling substance (baking soda, boracic acid solution, etc.).

Persistent cases the treatment may be varied by the use of ointments which may be removed again by sponging with hot, soapy water. Avoid dusting dry baking powder or boracic acid powder on oozing sores, as the latter will be sealed over by a hard crust, thus aggravating conditions while frequent exposure to air relieves them. In light cases where the oil of the ivy has not as yet penetrated the skin, scrubbing with laundry soap in running water will remove the danger.

Advice Was Sound

Curran was one of history's most capable legislators. A client once complained that he had entrusted fifty gold pieces to a merchant who now denied the transaction. Curran advised: "Deposit fifty pieces more, but take along a friend as witness." These instructions were followed. The following day the lawyer advised: "Go and withdraw the gold you deposited yesterday." The merchant returned this money without complaint.

"And now," was Curran's final advice, "take your witness-friend with you and go and get back the other fifty gold pieces."

Hits is being grown on dry land in Manchuria.

Beauties Of Coral Reef

Growths Look Like Plant Vegetation But Are Really Animal Structures

The finest coral barrier reef in the West Indies borders the eastern shore of Andros Island, in the Bahamas. It is some 200 miles long and grows near the edge of a submerged cliff facing the trade winds. A short distance to the windward the submarine precipice plunges vertically more than a mile into the depths of the Tongue of the Ocean, an arm of the sea penetrating the heart of the Bahaman archipelago.

As our sails over the coral reefs in a glass-bottom boat and gaze down at the sea gardens, the coral caresses surrounding by thickets of waving sea growth to the uninitiated appear to be a plant vegetation or varied hue and graceful form. These are the gorgonians and, far from being plants, are in reality animal structures. Like the corals, they are composed of polyps, but instead of building limestone habitations they have specialized in horn, or chitin, as a building material, according to the National Geographic Society.

If one were to don a diving helmet and descended into the water to examine the gorgonians more closely, he would see that the fertile polyps, the flat, lazy fronds of the sea fans and the club-shaped branching of the sea bushes are clothed with close-set ranks of tiny expanded polyps, tinted green, yellow, pink or white. Myriads of starlike forms extend radiating arms around open mouths, hungrily sweeping in their invisible prey. The delicate translucent, crimson, which is the body, rise from plitlike openings perforating the branches of their common dwelling places. There is no evidence of activity. Yet beneath the outer crust their bodies unite in a network which permeates the entire structure.

Has Been Well Preserved

Old Fort Wellington In Ontario Is Now Historic Site

It is gratifying to find that old Fort Wellington at Prescott, Ontario, on the Ottawa River, in the upper St. Lawrence region, is becoming increasingly popular with visitors, to the extent, indeed, of being over a thousand times as busy as it was some years ago.

This fortification which one shell of high explosive would today shatter to atoms, has been described as one of the best preserved old military works in Canada, and certainly its condition and the repairs to which it is subjected year after year form striking tribute to the interest which the Canadian government administration has taken in its welfare. It is today largely as it was when it was manned by British garrisons, and when its cannon, now so useless really mean business.

New included in the National Historic Sites and set aside for perpetuity as a historic site, Fort Wellington is well worth examination on the part of any person, no matter how busy he may live, who is interested in the past of the country and in the incidents associated with its history. It is encouraging to find that more and more people from all points of the compass are making their way within the palisades of the old fort to marvel at the skill of the engineers who designed it well over a century ago and to rejoice in the fact that it no longer serves a warlike purpose. — Brockville Recorder and Times.

Ireland Planting Trees

Free State Is Importing Seedlings From Other Countries

The order for 1,750,000 transplants and seedlings have been ordered for this year's tree-planting drive in the Irish Free State, as announced by the Department of Lands at Dublin. The potential trees include larch, Scotch pine, Norway spruce, Japanese larch, silver fir, beech, birch, ash and oak. Because domestic nurseries could not fill the larger order seedlings are being exported from many other countries.

Due to rotation of the globe, west to east flying is less difficult than east to west flying; spinning of the earth gives the east-flying aviator a tailwind at high altitudes.

The United States weather bureau has been sending out warnings on tropical storms ever since 1873.

Bullwinkle has approximately the same food value as skim milk.

Britain now has 24 charities for the blind.

Value Is Obvious

Sensible People Will Have Medical Examination Every Year

The Canadian Public Health Association is on record as favoring annual health inspections for the public. Dr. H. M. Harrison emphasized the fact that pain often causes too late to appreciate an individual that there was something seriously wrong. That, in cancer for instance, is easy if presence of disease is discovered in the early stages. British Columbia and Alberta have drafted health insurance bills and in both there is provision for compulsory annual medical inspection.

The value of annual medical examination is so obvious that the wonder is no comparatively few people make a habit of it. They do not go to a doctor so long as they feel well, or, at least, there is nothing serious to bother with them. Of they do not go for an annual examination, but by that time the trouble may have obtained such a hold that it is too late to do anything. It has been said that a firm hold that it is bound to do some damage anyway. That analogy may be applied to the human body. In a sound system of state medicine, which will possibly come in the near future, compulsory annual medical examination will be one of the provisions. When it does, millions of dollars will be saved by preventive treatment and the elimination of premature deaths.

A man buys a car and takes it to a garage for inspection if he thinks that it is the best way of seeing it with it, or if he is going to make a long journey and will bring it hard for some days or weeks. But he will give his car over to a garage for years without taking it to the doctor to get an O.K. on it, or to have some adjustments made. — St. Thomas Times-Journal.

New Language Ideas

Woman Issues Newspaper With Vocabulary Of Only 80 Words

Known as the "80 Word" newspaper, a tabloid weekly newspaper with a vocabulary of only 80 of the most common words is now being printed in New York.

It is the America World, whose editor, William Brewster, former teacher in the public evening schools and the University of Washington, has been a frequent visitor in New York for the purpose of making connection between the city and the newspaper, whose aim is to help the "80 Word" newspaper writers.

"Major H. B. King was my first good professional friend and it was in his home that the fundamental principles of the '80 Word' newspaper were incubated. For this reason I have always felt an obligation to him."

Major King, principal of the high school, Kitchikan, B.C., has during the past year been making an educational tour of the world for the provincial government.

The eight-page newspaper is sponsored by the language research institute of New York, of which Miss Brewster is director. It reaches an average of 8,000 students in elementary schools of New York; 200 in other cities and, in addition, is distributed in prisons and settlement houses, in libraries and to private individuals.

It has become an integral part of the New York evening edition and its official listing is being negotiated.

Miss Brewster discovered while teaching that the highest ambition of the foreign-born is to be able to read a newspaper. As a result she made up a paper for her night classes in Seattle, the first of the series of 3,000, 600 and 1,000 words.

Coming to New York to continue her language research work, Miss Brewster kept up her investigations into simple newspaper words finally arriving at a 80-word vocabulary.

Major Cattle Rustler

The modern-day cattle rustler, who whisks livestock away in his truck, because the target at Cody, Wyoming, of western cattlemen. Justice for him, representative cattlemen from Wyoming, Colorado, Montana and Idaho are expected to appear on the "rubber-tired rustler" through the cooperative plan of livestock brand exchanges.

A new telephone cable is capable of carrying hundreds of telephone messages at one time.

WORLD HAPPENINGS
BRIEFLY TOLD

The motor car age is finding its old competitor still going strong in Conway, Missouri. Thirty hitchhiking pots are being erected in the business district to accommodate those who still drive horses.

A paper circle, two inches in diameter and cut from a plain playing card, is expected to fetch nearly \$100,000. The card bears on its back a miniature portrait painted by Holbein the Younger during the reign of Henry VIII.

Evangeline Booth, commander-in-chief of the Salvation Army, said she will visit Canada and the west coast of the United States next September. The visit will be part of the army's "two years-two million souls campaign."

Preparation of motion picture films to be used for educational purposes in the fight against eye hazards was discussed at a meeting of the Canadian Association of Film Makers in Ottawa.

All weather highway between Edmonton and Jasper, and graveling work on the trans-Canada route between Calgary and Banff will be completed this year, acting Premier George Hoadley announced at Edmonton.

A government bill empowering the finance minister to float loans to a maximum of \$750,000,000 was passed by the House of Commons. It was expected the government would enter the money market on a refunding program when it was favorable this fall.

A drop of more than \$3,000,000 was shown in the total deposits of the Bank of Canada during the week ended June 12, according to the Bank of Canada statement recently issued. The reserve in United States funds for the same period declined by more than \$2,225,000.

Seven-year-old Mickey Tushan of Richmond, Ont., weighs 50 pounds, and when he holds his 10-pound muskallunge in the Ottawa river near Lake Deschambes he was almost purred like a lion. Mickey's father claims he is the ruler and the muskie was landed.

One Way To Save Money

Cash Register Drawer Sticks And Reveals \$291 Deposit

Lawson McKague, general merchant, of Victoria, B.C., is richer by \$291. He has been getting small change into a savings bank but didn't know it.

The drawer on the cash register in his store had been balky for several weeks. It hadn't closed as it should when it was wound up. A short time ago a regular traveller dropped in and offered to repair the machine. The traveller finally got the drawer open and 260 or more dimes tumbled to the floor. Further investigation revealed the register was so bungled with the drawer open it couldn't close. Several customers in the store helped him gather it up. When counted it totalled \$291, mostly dimes, some nickels and a dollar bill, weighing 14 pounds in all.

The silver had slipped through a crack in the back of the till. The storekeeper had often found dimes and nickels and dollar bills but didn't know the till was "leaking." The silver had accumulated over the past ten years.

First Camp Fire Word

Scientists Discover Primitive Chinese Cooked Food

When Peking Man, earliest known human of China, chopped wood for his campfire 100,000 years ago, he chose a red bud or Judas-tree, according to botanists of the Geological Society of China. After using microscopes on remains of the oldest known fire laid by human hands.

Cross-sections of bits of charred wood from Peking Man's hearth are identified by their structure as a new species of Cereus. This tree would be a redwood, able to maintain redness that flower with purple-red blossoms in the spring in America and the Orient.

Under New Grading System

During the first five months of this year almost 30,000 pigs were sold in Canada under the new rail grading system whereby the farmer is paid for his pigs after they have been hung on the packing house rail. Around 35 per cent. of these hogs made grade "A" and 45 per cent. grade "B", with "C" and "D" rights, however, and some making up the rest in varying small amounts.

Food By Telegraph

Easy Now To Send Basket Of Groceries By Wire

Add to your grocery list—telegraph. So if a uniformed messenger brings a big mess of spinach to your door, make a friend who may live on the other side of the continent. Sponsors of the plan, attending the convention of the National Association of Retail Grocers in Indianapolis, explained it will be as easy to telegraph a basket of groceries as to write a bouquet of flowers. If it's spinach, you might wire back some broccoli.

FASHION FANCIES

ACCESSORIES TO ACCOMPANY SIMPLE FROCKS

By Ellen Worth

And set forth most delightfully possibly new. It takes just the minimum of effort and material to make these simple frocks. The vest may be in either short or long length. They lend their chic to the crisp simple frock. Neckline silks or cottons, plain or with a touch of silk, shantung, linen, pique and many other colors are popular.

Today's pattern also provides for both hats illustrated. They may make a contrast with the frock. They're remarkably easy to make. Make No. 619 into a designed hat. For requirements see pattern envelope. Pattern the cash. Address mail orders to: Pattern Department, Winnipeg Mail Corporation, 175 McDermott Ave. E., Winnipeg. The latest Pattern Magazine is better than ever. Fully illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to take the life of stay-at-home. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 15 cents.

Lobster Production

Canada Provides Nearly The Whole Of The World's Supply Of The Canned Product

Off the coast of Canada's Atlantic provinces the world's greatest lobster-producing area is located, and every year more than 800 canneries draw from this resource the raw material from which they produce one of the tastiest of sea foods. In recent years an increasing part of the Canadian catch has been marketed alive—shipped in the shell—is another way of saying it—but most of it, however, still goes into cans. In the past five years the total annual pack put up in Nova Scotia, New Brunswick, Prince Edward Island, and Quebec, has averaged, in round figures, 137,500 cases containing 45 standard-size cans each.

Lobster canning involves a number of different operations, and Canadian lobster canneries are required by law to measure up to certain standards as to machinery, equipment, and methods. Their operations are subject to inspection under the Meat and Canned Foods Act, which is one of the reasons they turn out so excellent a product. Canada supplies all but a very small part of the world's production of canned lobster.

It takes 1,000 portions to man the Pullman cars rolling currently over United States rails. 2104

THE REVIEW, REDCLIFF, ALBERTA

Easy Now To Send Basket Of Groceries By Wire

Add to your grocery list—telegraph. So if a uniformed messenger brings a big mess of spinach to your door, make a friend who may live on the other side of the continent. Sponsors of the plan, attending the convention of the National Association of Retail Grocers in Indianapolis, explained it will be as easy to telegraph a basket of groceries as to write a bouquet of flowers. If it's spinach, you might wire back some broccoli.

FASHION FANCIES

ACCESSORIES TO ACCOMPANY SIMPLE FROCKS

By Ellen Worth

And set forth most delightfully possibly new. It takes just the minimum of effort and material to make these simple frocks. The vest may be in either short or long length. They lend their chic to the crisp simple frock. Neckline silks or cottons, plain or with a touch of silk, shantung, linen, pique and many other colors are popular.

Today's pattern also provides for both hats illustrated. They may make a contrast with the frock. They're remarkably easy to make. Make No. 619 into a designed hat. For requirements see pattern envelope. Pattern the cash. Address mail orders to: Pattern Department, Winnipeg Mail Corporation, 175 McDermott Ave. E., Winnipeg. The latest Pattern Magazine is better than ever. Fully illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to take the life of stay-at-home. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 15 cents.

Cotton Grows Ten Feet

Farmers In Texas Are Trying Out New Variety

Farmers near Edinburg, Texas, await appearance of a new variety of cotton which is said to attain a height of 10 feet and produce an extra long fibre. It is known as "Extra long fibre." When the seed was sown in the new variety.

The "Artico" seed was sent to Edinburg growers under contract to return all seed from the 1935 crop to the original owners.

According to reports, the seed was found in an Indian cave in Colorado. The discoverer planted the seed and was amazed to find that the plants grew 10 feet tall.

Trains Of The Future

Streamlines Will In Time Replace Present Day Type

As soon as old Dillaba has been removed to the sidetracks of transportation, the day is coming when all steam locomotives will be relegated to the yards and be replaced by the new streamlined bullet-on-rails. Instead of the traditional over-the-shoulder of the future will wear a spool uniform like that of a chauffeur. His job will not be unlike operating a powerful, low-slung limousine. As for the fireman, he will be an out-of-date as the pillar rider on midday platform.

More speed with more comfort is the cry of transportation. It will be answered on rail as on highway. Watch Times-Review.

Making Success Of Venture

Hard Up Students In Budapest Have Started Bakery

Hard up, a group of students recently started a bakery in Budapest, Hungary, and the opening of their shop was made a gala occasion by professors and under-graduates who came in carful costumes. Batches of the first bread baked were presented to the governor. A symphony of student marchers advanced the funds to start the shop. The baker students expect to not only supply cheap bread for students living on meagre wages but to also attract business along the poor.

Recipes For This Week

(By Betty Barclay)

COCOA BREAD PUDDING

1 1/2 cups (1 can) sweetened condensed milk
3 cups hot water
3 cups finely dried bread or sifted soft bread crumbs
1/2 cup cocoa

1 tablespoon melted butter
1 teaspoon salt
On the heat of the last fiscal year's exports the new three per cent. ad valorem import tax which, according to Rome despatches, Italy has now imposed will affect Canadian exports to the extent of \$108,000 a year. Canadian exports to Italy last fiscal year had a value of \$5,630,636.

Blend sweetened condensed milk and water; pour over dried bread or crumbs which have been thoroughly moist with cocoa and let stand until cold. Stir in eggs, lightly-beaten, melted butter, salt and vanilla. Pour into baking dish, set in pan of hot water. Bake in moderate oven (350 degrees F.) forty-five minutes. Serve with plain cream or fruit sauce. Serve eight.

SAUSAGE STUFFED BAKED APPLES

1 pound pork sausage
4 cooking apples
1 cup sugar
1 tablespoon butter

Cut the apples and remove the centres. Stuff with pork sausage. Place in a baking dish. Sprinkle with sugar and dot with butter. Add 1 cup water, cover and bake in a moderate oven (350 degrees F.)

Gas In Bottles

Gas is being delivered in bottles to households in the islands and unusually inaccessible districts in the vicinity of Stockholm, Sweden. All the households have to do to enjoy the advantage of gas heating and cooking is to keep a few bottles of gas on hand. Some houses are being equipped with pipes and fittings through which the gas is sent from the bottles.

Take Pay In Water

Members of the lower council of Waukegan, Oklahoma, have voted salaries for themselves—payable in water. From the city's "liquor" tax the council member will receive 1,000 gallons a month from the municipal plant.

Little Journeys In Science

RODINE

(By Gordon H. Grant, M.A.)

Iodine was discovered in 1813 by French scientist, Courtois, who obtained it from the ash of seaweed. When the liquid was heated with sulphuric acid in a retort, a violet vapor was produced, which condensed in the form of brilliant crystals. Shortly after this discovery the name iodine was proposed for this substance because it comes from the Greek word for violet.

Iodine occurs in sea-water, in sea-plants and sea-animal, and in the thyroid gland of man and of animals. Most of the iodine of commerce is obtained from a compound called sodium iodate, which is found in small quantity in Chile saltpetre, or crude sodium nitrate.

Iodine is a shining, blackish-gray solid, which is nearly five times as heavy as water. It has a strong, rather unpleasant odor and changes to the vapour state even at ordinary temperatures. It is quite soluble in alcohol and in a water solution of potassium iodide. We are all familiar with iodine in the form of tincture of iodine, which is nothing more or less than iodine crystals dissolved in alcohol. A very small quantity of iodine starch solution a deep blue and this is an exceedingly delicate test for the element.

It is used in the manufacture of certain dyes and drugs which are used to make up the iodine of the consumer of iodine is the photographic industry which uses the two compounds, silver iodide and potassium iodide, in large quantities.

Iodine is an essential constituent of the body. A small gland known as the thyroid gland contained in the neck of the human body is a gland known as the thyroid gland which contains iodine. If iodine is not present in the diet the thyroid gland cannot produce this compound and hence the thyroid gland will be so prepared for table use, the small amount of iodine in the diet is sufficient to be considered sufficient to the body. Iodine is a natural deficiency in the regular food. Iodine is supplied in certain foods, such as spinach, lettuce, citrus fruits, bread, and milk.

Don't Let One Fly Escape

Constitute A Deadly Menace And Must Not Be Tolerated

Do you know that one fly lays one hundred to one thousand eggs in one clutch? It doesn't take much imagination to figure out the consequences if a few flies are allowed to roam about.

Of course, you and I loathe flies because they are irritating and disgusting. But we should not let them urge to get rid of them, we are not only protecting ourselves but also preventing their breeding.

Flies and refuse must be covered or buried, manure, rotting leaves kept well away from dwellings and all surroundings kept as scrupulously clean as possible. However, and wherever we help to keep them out of the house and all exposed food should be kept covered. Flies are everywhere. Flies, Pads, used regularly during the warm weather, will keep flies from coming in. It is a fact that happens to get in if used according to directions.

Medical authorities and scientists have proved by the most careful tests that the common house fly spreads deadly germs of infantile diarrhea and cholera. There is a complaint that claims the lives of so many little children.

Flies are a deadly menace and must not be tolerated. A fly will come straight from a heap of filth and settle on food or drink, if the latter is not protected, spreading disease that may cause a death right in your own home. Those citizens who have regard for the welfare of their neighbors and community will wage unrelenting war against fly pests and Wilson's Fly Pads will be of invaluable assistance in their efforts.

Nova Scotia Very Scotch

Parliament Is Always Opened By Brist Of Bagpipes

Nova Scotia, the land of Longfellow's "Evangeline" and popularly beloved because of that poem to be largely French and English, is largely by Scottish descent. The opening of Nova Scotia's Parliament is accompanied by the shriek of bagpipes, and several newspapers are printed partly in Gaelic. In the Nova Scotia county of Inverness, 75 per cent. of the inhabitants speak Gaelic, while less than half of the sturdy Canadian county in Scotland can speak that ancient tongue.—Provincial News Bureau.

Thought Himself Lucky

A Chinese in Calgary upset the two wheels of his rickshaw by falling when the magistrate fined him for traffic violations. "One dollar," said the magistrate. "Thank you. Yelly cheap," replied New King, the Chinese.

So many think religion is something to be argued instead of something to be lived.

Household Arts

by Alice Brooks

Work is Simple and Durable

PATTERN 5234

Tulips—here we enjoy the beauty and variety of their color. Here we find them translated into striking color, that new design that is so handsome and durable. This design has no bare—plenty of opportunity for color. You can do it all in one color or white, of course, but it is especially effective with the tulips done in varied colors and the leaves in green. You can make a striking cushion of the larger pattern or a handsome buffet or chair back out of the three pieces.

In pattern 5234 you will find a transfer pattern of the basket 10 x 14 inches and one and one reverse of the small pieces 5 x 10 inches; complete instructions for doing work; illustrations of all stitches needed and preferred. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. There is no Alice Brooks pattern book published.

ALABASTINE

Does Not Rub Off

YOU BUY ROADS, TOO!

The accompanying chart shows how the price
of gasoline to the retailer has increased since 1914. In
1914 the average price to the retailer of all
gasoline sold in Canada was 26.6 cents per
gallon. Since 1914, the price has fallen almost
continuously until in 1931 and 1932 it stood
at the unprecedented low of 18.5 cents—a
decrease of 30 per cent. But as the price of
gasoline fell, the tax on gasoline rose. The
data for this graph are based on figures pub-
lished by the Dominion Bureau of Statistics.

WHEN you buy gasoline, you also
buy roads over which to drive
your car.

Approximately one-fifth to one-third
of the price you pay goes directly to
your Provincial Government in road
tax.

Twelve years ago there was no gasoline
tax. Today the tax ranges from six
to eight cents per gallon. And yet
the cost of gasoline to you is no more
because during those twelve years the
price of gasoline has been steadily
reduced.

Imperial Oil played a leading part in
the developments that made lower
prices possible. But lower prices
were not achieved at the expense of
labor. Imperial Oil employees have
always been well paid. They work
under ideal conditions. They have
sickness and death benefits and pen-
sion plans to protect them and their
dependents. Five thousand of them
are part owners of the Company.
They are given every incentive to
work efficiently and happily. The
result has been better gasoline at
lower and lower prices.

Council Receives Complaint of Low Wage Scale Here

To Call Meeting of Employers To Discuss Question

Town Council met in regular session last Monday evening. Owing to the absence of Mayor C. H. Moore, Mr. J. Bergeron waited on council and asked for price of building opposite the post office on Broadway at present offered by the town. The matter was left in abeyance until building committee inspected same and reported to council.

A letter was read from Mr. McWhorter offering \$150.00 for the building now occupied by him on Broadway. The matter was referred to the building committee for investigation.

Mr. F. Broughton, building inspector, reported on repairs made on Gibson & Tupper building on third street. The brickwork on the front of the building has been removed as this was dangerous and replaced with metal. He reported that this work was now completed. Mr. Broughton was instructed to complete other work on the building.

Mr. Lawson applied for lease on town property along C. P. R. Y. north of the main line. His application was accepted.

A motion was passed authorizing the secretary to write the Utilities Commission asking if council could make a grant to the Canadian Legion in lieu of taxes on the building.

Several applications to take advantage of the Tax Council's action Act were received and approved by council.

R. Phillips wrote advising council that he had advised Lupton by falling on town sidewalks and asked for compensation for loss of work and medical attendance. The matter was referred to the company which carries insurance for this purpose.

A request from the school board for \$300 for school purposes was granted.

The monthly accounts were approved for payment.

Mr. Schecher of Walsh made an offer of \$10.00 for an easement owned by the town. The offer was accepted.

H. Bortis made application to get water connection with the town system. His request was granted.

A letter was read from a Masked drawing attention to the wage scale paid in some of the plants in town where \$3.00 per hour is paid at 25¢ per hour. The letter suggested that council call a meeting of labor unions, local M. P. and M. I. A. and that united action should be taken to protect against such a low scale of wages and to do away with sweatshop and slave wages. This brought up the question of wages in other than industries and council instructed the Secretary-Treasurer to arrange for a meeting of the managers of industries in town retail merchants, local unions and all engaged in business of any kind for the purpose of discussing this question. The date of this meeting was not set as many are at present holidaying but was left to the secretary to arrange.

Funeral of Late J. L. Wright Sunday

Took Place From Gordon Memorial Church

The funeral of the late J. L. Wright took place from Gordon Memorial Church last Sunday afternoon at 2:30 and the remains were interred in Medicine Hat cemetery.

Rev. Mr. Claxton officiated in the absence of the pastor, Rev. R. E. F. W. He was assisted by Mr. Bestard, a representative of the Bible Students Organization.

Mr. Claxton spoke on the 23rd Psalm and Mr. Bestard on the resurrection and both drew comforting words for the bereaved from their subjects.

The pallbearers were: P. J. L. L. C. H. A. R. B. L. L. E. Y. W. M. C. A. M. P. E. A. U. E. L. L. E. S. T. O. N.

Deceased leaves four daughters, Mrs. Page of Edmonton, Mrs. McKinley of Cadzack, Mrs. Cole of St. Thomas, Ont., all of whom were present at the funeral and Mrs. Fairbairn of Fairview, Alberta who was unable to get here owing to the floods in the northern part of the province. Mr. Page and Mr. R. K. Kinnear were also present. Mr. Wright predeceased him 19 years ago.

The late Mr. Wright was born in New Jersey, the son of a prominent Methodist Minister. He came to Medicine Hat 26 years ago and has resided in this district ever since.

Gene Mullard, who upon his recent arrival here, spent the last two weeks ago was sufficiently recovered to return home yesterday. She is now convalescing nicely.

11:15 a. m. Morning Worship 3 p. m. Service at Howell.

7:30 p. m. Evening Worship Rev. Mr. Claxton will take charge on July 21st and Rev. Mr. Williams on July 28th in the morning, and James Brown in the evening.

"The lover of liberty is always a lover of law."

The secretary-treasurer called for two weeks leave of absence for holidays. The request was granted and J. Kitchen was appointed to act as secretary-treasurer.

Aquatic Sports At the Swimming Pool Friday Night

Good Program of Events Has Been Arranged

Owing to the cold weather after the heavy rains last week, the sports which were to have taken place at the swimming pool last Friday evening, were postponed. These sports will now be put on Friday evening of this week, July 25th commencing at 6:30.

A good program of events for all ages has been arranged. This will consist of swimming races, diving contests, greasy pole walking, pillow fights, hidden treasure etc. for all ages and a penny scramble for the kiddies. Good prizes will be given for the winners of each event.

A silver collection will be taken at the gate and the pool depends largely on the proceeds from these sports to keep the pool open till the end of next month. It is hoped there will be a liberal response from the citizens generally.

As the pool is operated for the benefit of those who patronize it, and especially for the young people, all who can should enter enthusiastically into all the events so as to assure a good program for the spectators and to show them what the pool has accomplished in the way of developing good swimmers and divers.

Don't miss this event. The pool needs your help.

Public Meeting Here Monday, July 29th

Will Be Addressed By Hector Laing and Dr. Gershaw

Bills are now out announcing a public meeting to be held in the O. O. F. hall here on Monday, July 29th.

The speakers will be Hector Laing, M. L. A. for this constituency, and Dr. F. W. Gershaw, local member in the federal house.

The speakers will discuss public questions of the day, both provincial and federal. All are invited to attend. The meeting is called for 8 o'clock in the evening.

Voters Should Attend The Political Meetings

Many Will Be Held Until Election Day

Now that the date for the provincial election has been announced it is only natural to expect that several public meetings will be held between now and election day for the discussion of public questions.

All who have a vote should make it a point to attend these meetings in order that they may get a clear idea of the platforms and policies of the several parties and their candidates so that they will be able to consider and study all the question involved and be prepared to vote intelligently on election day.

There never was a time in the history of the province when it was more necessary to give careful thought and study to the affairs of the day and to

Social Credit Candidates Have Been Named

H Robinson is the Choice For This Constituency

H. Robinson, chiropractor of Medicine Hat will be the Social Credit candidate for this constituency in the provincial election on August 22nd. The other candidates are Hector Laing, the sitting member, Liberal, and J. Bullivant, Mayor of Medicine Hat, Conservative.

For Cypress constituency A. L. Hume, Bow Island, is the Social Credit candidate. The other candidates are Hon. Perin Baker, F. A. and Robt. Black, both are merchant, Medicine Hat Liberal.

In Emprise constituency David Lush got the Social Credit nomination. W. C. Smith, who has been the member for the past 14 years, is the U. F. A. candidate. There is also a Liberal candidate in the district but we don't know his name.

Swift Current & Ballantyne are playing a game with the local girls tonight. This should be a good game to see. Don't miss it.

It has been announced that the Douglas Social Credit Association of Alberta will enter a candidate in every federal constituency in this province. It is also rumored that the Aberhart group will line up with the Stevens party.

Take advantage of every opportunity to hear them discussed, on this occasion. This especially refers to those who are voting for the first time.

Liberal Landslide In Prince Edward Island Election

Not One Conservative Elected In The 30 Seats

In the provincial election held in Prince Edward Island last Tuesday the Liberal party, under the leadership of Walter M. Lee, made a clean sweep of the province. There are 30 seats in the legislature and in all of them Liberal candidates were elected. Not one Conservative or any other opposition member was elected.

There is no precedent for such a situation in any province in Canada. The nearest approach to this was in British Columbia in 1912 when 40 Conservatives were elected and only 2 Socialists as an opposition.

Mr. and Mrs. J. R. Riser and Mr. and Mrs. S. Bailey attended the Lethbridge Jubilee this week.

Mrs. Taylor and daughter, of Red Deer, arrived in town this week and are visiting the former's parents Mr. and Mrs. A. Paterson.

Gordon Memorial Sunday school annual picnic was held at Central Park, Medicine Hat last Wednesday afternoon. There was a large attendance of youngsters which required about 60 cars to take them to the grounds. A good program of sports was carried out and the pupils were provided with abundance of eats.

Joe E. Brown in "Alibi Ike" at Empress

Joe E. Brown is coming to Medicine Hat.

He appears at the Empress Theatre in "Alibi Ike," Warner Bros' home run comedy, based on the popular story of Alibi Lander.

Joe in the title role, is both a crack pitcher and the best batter of his club. He has an alibi for everything—not just for mistakes—but for plays any other player would have been proud of.

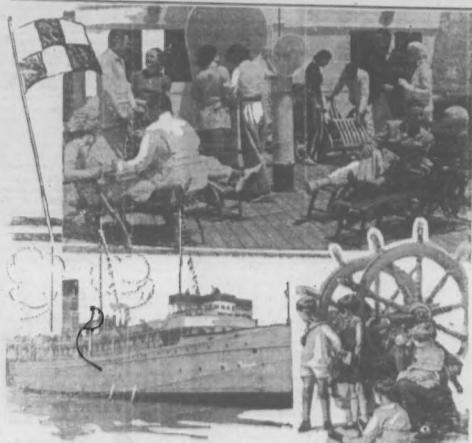

Joe falls in love with the sister of the captain's wife, but when he alibis on his romance, the girl hears him and turns him down cold.

Thrills follow in which Joe is kidnapped by a bunch of crooks but he escapes, and the romance is patched up by the players in one of the most comical climaxes imaginable.

Warner Oland has played "Charlie Chan" so often that friends now call him "Charlie." He now has the leading role in Fox Film's "Charlie Chan in Egypt," on the screen of the Empress Theatre next Thursday. The film was produced by Edward T. Lowe and directed by Louis King. The favorably supporting cast includes Rita Calderon, Thomas Beck, The Purple Sage Riders, a stage attraction in person will be the main attraction on this program.

LOOK AT YOUR LABEL

A Great Lakes Holiday

With the increasing popularity of vacation trips on the Great Lakes, the Canadian Pacific has extended its Great Lakes Steamship service to include calls at Port Arthur on weekend voyages as well as on weekdays. The Great Lakes make this the most direct route for those who desire to visit the lakes and the shore of the Great Lakes. The service includes a change of air, complete rest, and all the joys of a holiday. The Canadian Pacific Great Lakes Steamship line will have been equipped with deck sports, including golf, shuffleboard, and deck golf. Dining and music bring pleasure to the evening hours. The schedule makes it possible to take an enjoyable week's trip, either way, with overnight stops at both ends. Sailing Saturday, the round trip to complete the following Friday; sailing completed on Monday, the steamers leave Port Arthur at 8:30 a. m. on Wednesday and Saturday, arriving at Port Arthur at 8:30 a. m. and Port William at 1:30 a. m. on Mondays and Fridays, in time to complete the round trip. Sailing dock at 8:30 a. m. Steamships with train No. 1 leaving Port William station for the West at 7:30 a. m. on weekdays. On the eastbound trip departure time is 12:00 noon from Port William on Saturdays and Sundays, leaving Port Arthur at 8:30 a. m. on Mondays and Fridays, and Port William at 1:30 a. m. on Saturdays and Sundays. There is a standard time, on Mondays and Fridays, for the eastbound call but the call on the westbound trip has not been in effect for several years. Attractive all-expense tours at very low cost have been arranged to provide happy combinations of rail trips overland and steamship cruises across the Lakes, with interesting stop-over at famous vacation resorts. There is a standard westbound tour between Toronto and Winnipeg and a one-day eastbound tour from Winnipeg to Niagara Falls, with return trip in both cases.

HOW TO MAKE ICED TEA

Before the teapots of Soda Black Tea is a plot of fresh boiling water. After six minutes the liquid into two-glass container. While hot, add 1/2 cup of granulated sugar and 1/2 cup of lemon juice. Stir well until dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chopped ice.

Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion or International body. There are clubs to promote almost every conceivable thing, or object, in which mankind can plausibly be interested. Their number is legion, and new organizations spring into existence almost every week. Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, commanding the respect of all, and have made wonderful headway in the advancement of the world. Of such bodies are handed through, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when these conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment, and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada might take a very real and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now stating out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the fish and game clubs, the latter are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the sustenance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the right observance of those laws; to promote the conservation of the surface water supply, natural cover, trees and food conducive to the beneficial supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculture, not confined to men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close to home. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors directly balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life give to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the prosperity of the land rests, for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrollment as active members thereof, at least by extending their sympathy, interest, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Latest Method Detects Fingerprints On Cloth

After They Are Found, They Will Preserve Them Indefinitely

A new technique capable of developing fingerprints left on cloth—much as a smudge, negative is developed—has been solved by the New York police department's bag of tricks. The method, an indirect product of the Hingham case, involves the important accomplishment of preserving the original prints after they are found. Chemical baths bring out and fix the prints.

Shortly after the Lindbergh baby was kidnapped, Dr. Eystein M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopedale, N.J., to examine the ladder used in the crime.

Using an iodine gas process, he found 600 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identified.

Dr. Hudson was invited to direct the New York police department's crime-solving research in this field. The successful use of silver nitrate solutions on bleached linen and other clothes of light shades, and which is soluble on darker fabrics, followed.

The treatment brings chemical transformations of body salts in the way of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be seen by the naked eye.

The new technique is superior to the currently widespread method of dusting suspected surfaces with colored powder. It was said because the powder-dusting is effective only when the wax is fresh.

Airport Now Obsolete

Thousands of Dollars Being Spent On Alterations At Croydon

Improvements and extensive cost-cutting thousands of dollars are being made at Croydon Aerodrome to cope with the growth in air traffic. When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1923, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 200 per cent. Add air lines routed to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Easing airports.

The layout of the buildings is to be altered, and extended to speed up the examination of luggage and passports. Passengers who have flown from Paris in one and a half hours are sometimes held for 30 minutes for this inspection.

When the alterations are completed, the two existing passenger buildings will be replaced by a single, inspected while baggage is unloaded from the airlines.

Methods of simplifying the loading and unloading of baggage, and from motor coaches will be used.

An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day, of transportation is shown in an air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long ago to the vastly improved and more beautiful machines of to-day.

A feature of the indoor exhibit was a miniature display of Saint John river and port, with the ships with their ships anchored within, and a group of 71 pictures of sailing vessels in the early days of the Saint John.

At Union station the latest steam locomotives were on exhibition in the "Sunday best" while at Saint John airport a fleet of Canada's speediest and most up-to-date airplanes was shown.

South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imaginative with an eye on the development of long-distance air travel, are the winter sports of the coming day including in snow sports under the shadow of the active volcanoes of Erebus and the hunting seal, catching penguins going kayaking among the bergs and making short morning sled trips "into the blue."

Bill Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of the Antarctic, including possibilities of initiating a seal for trade, canning of penguin eggs and the opening of a winter sports ground.

Grading Garret Wheat

To Indemnify Grain Elevators For Loss Sustained

An appropriation of \$150,000 appeared in supplementary estimates tabled in the House of Commons, to indemnify grain elevators which may suffer loss through the separate grading of Garret wheat. The change in grading is to come into force on August 1, 1935, and the legislation was effected in an amendment to the Canada Grain Act passed last week.

Supplementary estimates amounting to \$15,362,978 were introduced by Finance Minister E. N. Rhodes. Outside of additional appropriations for public buildings, the measure securing the largest vote is national defence, for which more than \$2,000,000 is asked.

Battles With Reptile

Noted Traveller Scores Fine Specimen Of King Cobra

Lawrence T. Griswold, noted ornithologist who has headed a number of expeditions for the Smithsonian Institution and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, which he said, nearly took his life.

One night in the Philippine Islands Griswold encountered suddenly the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Wants Damages Work Is Recognized

Moore Ransomes Automobile And Moose Want Ontario Government To Pay

Last fall a bull moose ran into the automobile and a headlight rim, and was the victim of the Regina's Office, London, but none which periodically claims public attention as that of Henry Cook, probably in 1923, which might be read at Wm. Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petting zoo reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

Will Is Read Yearly

New Claim Public Attention Since Probation In 1573

There are countless other testaments in the vaults of the Registrar's Office, London, but none which periodically claims public attention as that of Henry Cook, probably in 1923, which might be read at Wm. Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petting zoo reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

May Take Pets On Train

New Rules For Passengers Using Sleeping Car Drawing Rooms

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned.

The Canadian National Railway, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

Had To Think Quickly

A harridan who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and impudent scoundrel."

The harridan whispered to him that the prisoner was his client, whereupon he continued: "But what great and good man ever lived who was not called by many of his contemporaries?"

Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

Frederick Henrichs designed to take panoramic views from the air, is equipped with eight lenses whose combined range encompasses the entire terrain at all points of the compass. At an altitude of 15,000 feet it is possible to photograph an area of 720 square miles, the manufacturers claimed.

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regain and maintain it

Many a body in Canada manifest abundance the day when the purest of Little Menstrues. These health-giving Salks are not only refined by expert Chemists in the form of SASKASAL SALT.

THE SASKASAL in turn give us pleasure in its simple form—our pleasure to take—our pleasure to purify, restoring product of Nature and the Salks are the Salks of SASKASAL SALT, as valuable to you as any Salks in the world, and maintaining it in its purest form.

Use For Constipation

The Mohammedan lunar year of 354 days is a calendar which corresponds to nothing in nature, says an Egyptianist, yet the Egyptian calendar system has been used for 1,313 years—or, as a Mohammedan would count it, 1,314 years.

Must Import Grain

Manchuria Will Require Extra Supplies To Feed Population

For the first time in many years, Manchuria will, this year, have to import grain in order to keep its own 20,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of millet and other grains will be a failure, except in favored districts, and already the government of Manchuria has made arrangements to import 50,000 tons of rice from Saigon, Haiphong and Bangkok. Several large purchases are contemplated.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist normally upon mostly millet and kaoliang, a species of maize.

Shorter Men For Army

British Regulations Fix Minimum Height For Infantry At Five Feet, Two Inches

The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is two inches below the old minimum.

Cavalry of the line, tank corps, Royal Engineers, army ordnance corps may all accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The war office is determined, in view of the dearth of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

Unfounded Deductions

Some Common Fallacies About Drought Conditions In The West

The weather men say unfounded deductions are drawn from wind erosion of the soil. It is common to hear that the central plains of the continent are turning into a desert. It is frequently heard said that the climate is changing completely. These would be special charges, but they are inferred from false, or inadequate, premises. They are at the moment founded on the dust storms that have come with the higher winds of spring and early summer after a few years of drought. But dust storms have not been in the central plains. More than that has been needed through the ages, and more than that is still needed, before a new Sahara can spread itself.

The cause that brought about the old Sahara is not found on this continent. The Sahara resulted from the melting of the ice-cap that lay on Europe, and that absorbed the air currents which govern the earth's weather into new paths as they flowed south, thus altering Africa's climate. There are local cycles on this continent, but none that have not been understood to have discovered any determined trend to an upheaving climate change being imminent in North America. There cannot be as long as the frozen North remains there. That is one may know now. It was not at all a desert. The process of its change must take 5,000 years, and possibly 10,000 years. This removes the subject beyond practical interest.

When attention is turned to what may be regarded as the "weather," a distinctive from "climate" there are more pertinently distressing considerations. Their causes become amenable to explanation, and should be capable of intelligent correction. Dr. J. W. Humphreys, of the United States weather bureau, has been reverting to the weather by man's folly. Great changes in an unchanged climate is being blamed for may, in effect, be partly due to man's folly. Great changes in an unchanged climate is being blamed for may, in effect, be partly due to man's folly. Great changes in an unchanged climate is being blamed for may, in effect, be partly due to man's folly.

Return these fallacies require removal of Nature and Dr. Humphreys, talk about the effects on this continent becomes absurd. It predates the unimaginable future. It helpfully suggests that having changes that will be brought about only after countless ages have passed. Yet what man has done, man can and should do. The willfulness that has devastated through many seasons can be reversed in a single year. The drought is not cured surgically. The task of restoration has to be commensurate with the injury done. It calls for the enduring and intelligent persistence of any people.—Winnipeg Free Press

Ancient And Exclusive Lodge

Order Of The Garter Founded About 600 Years Ago

Probably the most ancient and exclusive "lodge" in the world met recently at Windsor Castle when the Most Noble Order of the Garter convened for the first time in 22 years with the Prince of Wales in the chair.

The Order of the Garter was founded about 600 years ago by Edward III, and is limited to 28 members, of whom the King and Prince of Wales are "ex-officio." Membership is by appointment by the King and is selected from peers who have given distinguished service to the country. Each knight, as he is called, has a stall in St. George's Chapel, inside Windsor Castle, and as long as he lives his banner, sword, helmet and crest hang over the stall. Members were given a very beautiful and ornate regalia, a notable feature of which is the collar of 28 "Order" medallions of pure gold weighing over two pounds. The garter itself is of dark blue velvet and is worn below the left knee. Among the several ornaments are two jeweled figures representing St. George and the Dragon.

What did the members talk about, one wonders. "For the good of the order!" St. Thomas Times-Journal.

Americans bought less than half as much jewelry in 1933 as in 1919.

CANADIANS TO ATTEND EMPIRE PARLIAMENTARY ASSOCIATION CONFERENCE

Above are seven prominent Canadians who are expected to be included in Canada's contingent to the gathering in London, England, of the Empire Parliamentary Association. Delegates from every Dominion and colony will be present at the special Silver Jubilee meeting. Top, left to right: Senator F. B. H. Black, Senator Lorne C. Wedder, and Senator A. B. Cope. Below, left to right: Hon. Hugh Guthrie, C. H. Devlin, M.P., Hon. J. D. Chaplin, and Dr. Arthur Beauchamp, K.C., Clerk of the House of Commons.

People Largely To Blame

Demanded Luxuries Which Helped To Bring On Depression

Back in the giddy twenties the Canadian who's got something to eat, and some of their cars here—upon were prized with bathing suits, and some of their cars here—upon were prized with bathing suits, and some of their cars here—upon were prized with bathing suits.

The incident is characteristic of the luxurious days when it seems, as we look back, that the spending of money on things of no real consequence reached grotesque lengths. The railroads gave us palatial hotels, radio cars, telephone cars all sorts of services that had nothing to do with the basic problem of moving people speedily and safely from one place to another place, but they insisted on coming with their generalization and should not be singled out for blame. As the Bradford Electric put it:

"It was an era of extravagance and expansion in almost every line of business. . . . It was a period of failure in which for a time there appeared no limit. . . . The extravagance cost the country a lot of money but perhaps the experience is not altogether without profit."

Corporations competing for patronage thought the people demanded extreme luxury, set out to provide it. Everybody assumed cheerfully that "good times" were here to stay, that the road would be on up. Since we have come down to earth, individually and collectively, we like to deduce those who led us into our extravagance later about to be unjustified, which is unjust. Actually there existed a sort of mass hysteria, a concerted levitation, and the blame for both cars and all they represent rests on us all.—Ottawa Journal.

Makes A Difference

It is told of Rudolph G. Spreckles, who was a Canadian, and a California hotel, when the clerk saw the signature he said: "Mr. Spreckles, you will want the Rose Suite, I am sure."

"Oh, no, I'll take something less expensive."

"But, Mr. Spreckles, your name always occupies the Rose Suite when he stops here."

"My son," replied Mr. Spreckles, "has a rich father. I am not so fortunate."

The Old Iron Horse

World Will Be Much Duller Place Without Them

Take the old-fashioned steam locomotive can you've got something as near to the human as man yet has been able to contrive.

It radiates a glow and a warmth of its own. Its tool of whistle and clang of bell, its snort and puff, its pant and its buff, its throbs and its quiver, give it a personality no other man-made mechanism ever has attained. You'll admire these streamlined beauties, doubtless they will be commercially profitable, but you'll never love them.

You'll never have the boys gathering at the depot to see old No. 46 come in as if they can see in an aluminum streak making across the landscape at 100 miles an hour. This world will be a sadder and duller place if the old iron horse is ever crowded off the rails.—Buffalo Times

An Electric Lithouse

New Zealand Has Just Completed One For Harbor

New Zealand's first coast light-house to be lighted by electricity has just been completed at the entrance of Wellington Harbor. A strong electric plant has been installed in a reinforced concrete tower standing 60 feet high on Haring Island. The light is a powerful 100,000 candle power.

Bare Penny Stamp

A pair of well penny stamps of the earliest New Zealand issue were sold at Auckland for \$1,000. They belong to a series shipped from London in 1854. Popularly known as "half-faced Queens," they are dull crimson in color, engraved from portrait of Queen Victoria in state robes. There are probably are 100 single copies of the stamp in the world. Very few pairs are known to exist.

Electric Glows For Police

An idea born of Ohio mail riots in 1930, a "policeman's electric glove" for handling disorderly crowds, was demonstrated to New York police by Ciro H. Hennessey, chief of Havana, Cuba. Operated with storage batteries, the glove will incapacitate a person without injuring him, Diaz said.

The King's Bodyguard

Late Inspector Fitch Knew Close To King Edward

Known as "The King's Shadow," ex-Detective Inspector Thomas Fitch of Scotland Yard, whose death at 56 was announced recently, earned his nickname when attached to King Edward as his bodyguard. It was his duty, naturally, to be only a few yards away from His Majesty.

Once, when Fitch was following the king at the usual discreet distance through the streets of Paris, King Edward decided to play a joke on him. He hailed a passing motorist—a personal friend—jumped in the car, and drove off.

Several miles they drove, and when they pulled up—there was Inspector Fitch, in a police car, the usual distance behind! The king laughed and said: "I had a bet with Count de— that we could run away from you. I'm afraid he's won. I must congratulate you on your driving."

Many Are Inquiring

Canadians Are Anxious To Join Royal Air Force

More than 2,000 inquiries regarding the colonial and Dominion enlistment plan of the Royal Air Force have been received at Royal Canadian Air Force headquarters, Ottawa, since the R.A.F. opened its doors authorized by the British government.

It was not known how many men the Royal Air Force would accept from Canada, and qualifications demanded for the three categories open are very high. R.C.A.F. officials explained.

R.A.F. categories open were short service commissions, for which 1,000 inquiries had been received; permanent commissions and apprenticeships, or positions as airman, for which another 1,000 inquiries were received.

Telephones Toll Over The New Line

Between Japan and England is \$30 for three minutes.

New Transfusion Method

Large Quantities Of Blood Can Be Given If Needed

A new and revolutionary method of blood transfusion by which relatively enormous quantities of blood can be given in case of need has been developed by two doctors of the Middlesex Hospital, London.

The success of the new experiment, which is known as the "continuous drip" method, was revealed by the two doctors in an article in the Lancet, British medical magazine.

A patient dangerously ill with anæmia received during the new method, and recovered.

It has been held impossible to give large quantities of blood at one transfusion. The amount injected into a patient's veins is usually only about a pint or a pint and a half.

In the "continuous drip" method new pot forward, contributions of blood are collected from a number of suitable donors—as many as ten have been used for a single case—and are mixed before use.

A glass reservoir containing the mixed blood hangs at the head of the patient's bed, connected by a rubber tube into one of the patient's arm veins at the rate of about 40 drops a minute—or a pint in four hours.

One of the rubber tubing allows the patient to move about comfortably in bed, and the supply of blood in this way has been continued as long as 24 hours without harm or discomfort.

At the end of this time the change of blood was so great that it was possible to perform a risky operation with success.

The inventors of the new device have so far performed seventeen large "drip transfusions" and they believe that there are many diseases in which a liberal supply of blood from outside the body will make all the difference between life and death.

Re-Naming The World

Changes Being Made Are Bound To Cause Confusion

The business of re-naming countries and cities of the world is becoming so confusing to many people that one professor of geography is moved to protest against the present chaos.

Pointing out that students are handed text books, atlases, and other reference works which show no agreement regarding foreign names, the professor continues: "One large commercial atlas shows no old names. Naturally students are bewildered. The professor continues: 'One large commercial atlas shows no old names. Naturally students are bewildered. The professor continues: 'One large commercial atlas shows no old names. Naturally students are bewildered.'

Had Fresh Fear

Dr. Aeneas Avellano, of New York, who would avoid nothing, said that he was spoken in his Chelsea mansion, died at the age of 85 years.

He was a leading classical scholar and his books included a translation of Robinson Crusoe into Latin for children. He was a later of fresh and daring that it was hard to heart, and last year attributed his long life to the fact that he slept with his windows shut.

Russian Children Drive Cars

Children of Russia between the ages of 12 and 14 are to be taught to drive automobiles. Factories in Moscow are to produce special cars for this purpose. They will have a one-cylinder engine of one and one-half horsepower, and a maximum speed of 20 miles an hour. The price will be low.

The potato originated along the Pacific coast of South America and was introduced to Europe by Spaniards.

British members pay \$285,000,000 into the nation's treasury annually.

Fuel May Be Grown

Possible Agricultural Alcohol Will Take Place Of Gasoline

Canada has never yet produced a large oil field. But it has vast acreage devoted to grain crops which could be used to produce a renewable, profitable price. For the reason, this country is tremendously interested in the experiments looking to the substitution of alcohol for petroleum as a source of motor fuel.

At the forum of agriculture, industry, and science in Dearborn, Michigan, scientists reported on experiments in the products of motor fuel and the blending of agricultural alcohol with gasoline. There was some conflict in the evidence presented. Some of the scientists felt that agricultural alcohol would not receive the additional \$5 billions. The alcohol would be available as motor fuel at 15 cents per gallon.

Other scientists questioned if alcohol blends were as efficient as gasoline. On only one matter was there agreement. It was that if it alcohol becomes the chief motor fuel of the future, there will be a period of transition years of development during which farmers can adjust their production, refining methods can be developed, and gasoline engines can be altered. When agricultural alcohol will be an important economic factor.

But the automobile and industrialists will contest. Before an other five years have passed we may have more definite information as to the possibilities of utilizing the product of an annual crop rather than the product of a disappearing asset.

In any event, if the farmers were to supply the motor power for the nation's economy of the continent, it might well be that the surplus of foods would in time become a by-product of agricultural activity and the long-looked-for back-to-the-farm movement would take place without any artificial stimulus.

Of such far-reaching character are many of the hidden economic changes of the new future.—Financial Post.

Travelling At High Speed

People Must Meet Of The Things

Rome motorist has discovered that at forty miles an hour he cannot see the vehicle. He can see many other things which are more obvious, but the vehicle are hidden from the man travelling at high speed. Is it not true that we are so busy with our travelling at an unprecedented speed, missing some of the most charming beauties of life? We are in too much of a hurry to spend any time over things which if we took more time, we should discover well worth the time to stop and appreciate. An art gallery cannot be visited at a mile a minute. It takes time to appreciate the beauties of any great beauty. It takes time to appreciate the beauties of any great work of literature.

It is not arguing that speed is not useful, for it is, but the very thing that gets us to the end of our journey in shortest time has the defects which we might expect, and it necessarily misses much that is well worth seeing. The man who is carelessly rushing here and there may think that he is exceedingly busy but he will miss some of the chief things of life. "We must take time to think, time to discover our neighbors, time to discover God. The best things in life are those which we cannot see by hurrying to a proper appreciation of the virtues and values of life.—The New Outlook.

Depends On Viewpoint

People Have Different Ideas As To What Constitutes Wealth

A woman has said in court that with \$60,000 in her name she would not call herself rich. In another court a bookkeeper said that he did not feel wealthy on \$5,000 a year and sometimes was very hard up. An average of 12 and 14 are to be taught to drive automobiles. Factories in Moscow are to produce special cars for this purpose. They will have a one-cylinder engine of one and one-half horsepower, and a maximum speed of 20 miles an hour. The price will be low.

The potato originated along the Pacific coast of South America and was introduced to Europe by Spaniards.

British members pay \$285,000,000 into the nation's treasury annually.

Interesting Local Items

Mayor Cox spent a few days
in Lethbridge this week attending
the city's golden jubilee.

Mrs. R. B. Simpson and family
are spending their holidays in
Calgary visiting friends.

Miss Royal Park of Calgary
is at present the guest of Harriet
and Margaret Walker of the Box
Springs district.

Mounted Police were in town
yesterday and took a number of
ransackers off a passing freight
which stopped at the station.

Machine men from the glass
plant held their annual picnic
at the river north of town last
Sunday. There was a good at-
tendance and a pleasant outing
was spent.

Ted Maskell left this week
for Sarcee camp to take a course
at the military school. Jack
Hrydle is taking his place in
Gusta store during Ted's absence.

Mrs. and Mrs. J. Hope accom-
modated 20 guests in their cottage
at Elkwater lake last Sunday,
most of whom were compelled
to stay over night owing to the
bad condition of the roads after
the heavy rains Sunday.

An auction sale of the goods
and chattels of the late J. I.
Wright will be held at his late
residence, on Fifth St., Satur-
day afternoon July 27th con-
vening at 1:30. All kinds of
household effects will be disposed
of by auctioneer W. H. Dacre.

CARD OF THANKS

The executive of the Redcliff
Stampede Association wish to
render their thanks to the citi-
zens of Redcliff and district
who helped to make this year's
Stampede such a great success
especially to the judges and Joe
McKinnis for their help on the
grounds, and the Asahibola
Hotel, McDonalds Conditary,
J. J. Lang and Canadian Legion
of Medicine Hat and the local
Legion for donations to the Ath-
lete events.

W. H. Dacre Sec-Treas

To The Electors of Redcliff, Dunmore and Medicine Hat

It is with pleasure that I re-
vocate myself with the plat-
form of the provincial Liberal
party here enunciated, and in so
doing I solicit, in the election
which has just been announced
a continuation of your support.

Briefly, I should like to iden-
tify my name with some of my
efforts of the recent session of
the Provincial Legislature
and specifically to mention the
following:

(1) Advocacy of the estab-
lishment of Old Age Pensions.

(2) My stand in respect to
the inclusion of the railway run-
ning trades in the workmen's
Compensation Act — advocat-
ing that themselves should be
allowed to determine their
inclusion or exclusion.

(3) Advocacy of a survey and
judicial and economic devel-
opment of the natural resources
of the province with adequate
safeguards against monopoly
and exploitation.

(4) Leadership in the provin-
cial house in the matters of el-
ucation, as curriculum content,
supervision, grants, teachers
salaries, uniform curricula,
rural education, and the lar-
gest unit.

(5) Continued demands for
balanced budgets; consistent
opposition to and condemnation
of the average annual increase
of five million dollars to our
provincial debt and of a govern-
ment which seeks social legisla-
tion.

HECTOR LANG, M.L.A.

ment which in fourteen years
has increased that debt by 8
millions of dollars; and condem-
nation of the situation in which
46.74% of the governments in-
come goes to meet debt charges.

(6) Advocacy of the full re-
sponsibility of unemployment
falling on the federal govern-
ment.

(7) The first in the province
legislature to advocate study
and action respecting our delin-
quent youth, an insistence on
differentiation between harden-
ed and new offenders, a policy
of reform, not retribution, and
of the adoption of some system
similar to the Borstal system.

(8) My place in the van of
those who seek social legisla-
tion.

that is desirable, sound and prac-
ticable.

The Liberal party of the pro-
vince of which I am proud to
be a member is a party—

(1) Which stands for the in-
terests of all classes—the wel-
fare of the people of Alberta as a
whole.

(2) Which will work with the
federal government to overcome
constitutional difficulties.

(3) Which stands for econ-
omic and efficient administra-
tion.

(4) Which stands for mon-
etary reform of a sound and
actionable type, the rebonding
of provincial debt at reduced
interest rates, a nationally
controlled Central Bank of Canada.

(5) Which accepts the chal-
enge of the new era—but with
no rest on the ground.

(6) Which will adopt or re-
ject no measure or policy until
all features of the plan are
thoroughly known and under-
stood.

(7) Which is the only means to
the end of defeating the present
inefficient, extravagant and
senseless administration.

(8) Which will form the gov-
ernment of the province in 1935.

Your endorsement of the party's
platform and your active sup-
port of my personal candidature
will be sincerely appreciated.

HECTOR LANG

CARD OF THANKS

The daughters of the late J. I.
Wright wish to express their
sincere thanks to the citizens of
Redcliff who were so kind to their
father during his recent ill-
ness and also so kind to them
while here. Especially would we
remember Mr. and Mrs. L.
Dunmore and Mr. Pearson for
their interest in our father's
comforts.
